

According to my

[[[http://dennis.dieploegers.de/doku.php/my2cents/think\\_big\\_-\\_a\\_development\\_methodology](http://dennis.dieploegers.de/doku.php/my2cents/think_big_-_a_development_methodology)|think big methodology]] I'm starting to drop and document some of my scripts and hacks I'm using while administering Zimbra in

[[[http://dennis.dieploegers.de/doku.php/article/zimbra\\_scripts](http://dennis.dieploegers.de/doku.php/article/zimbra_scripts)|this wiki]].

This is partly for my own reference and partly for people who like to know how extreme and dirrrty bash scripting (or like I call it „pipeing“) works or who are in the same position I am in.

Have fun with it.
