

I've done some cleanup here and removed the bilingual setup as I noticed, that I'm only writing english posts. So I threw away all the clutter (although the german version of the CV is still reachable).

And I made the people sad, who like my adaption of the zenlike template, because I switched to a bootstrap-backed template.

Yeah, I know, bootstrap's spamming the web, but I find it very clear, readable and well structured. So I switched to the wonderful [\[\[https://www.dokuwiki.org/template:starterbootstrap|Starter Bootstrap\]\]](https://www.dokuwiki.org/template:starterbootstrap)-template by Cameron Little.
